
HARSH DEPANI | FULL STACK DEVELOPER (MERN)

www.linkedin.com/in/harsh-depani | +91 96018-94287 | harshdepani2509@gmail.com

PROFESSIONAL SUMMARY

Passionate and motivated aspiring Full Stack Developer with practical experience in the latest web technologies such as HTML, CSS, JavaScript, Bootstrap, and MUI for front-end development, and Node.js and Express.js for back-end development. Experienced in developing dynamic and responsive web applications using React.js. Keen to utilize technical skills in a collaborative setting and help develop real-world projects while learning and growing as a developer.

TECHNICAL SKILLS

- ✓ Frontend: React.js, JavaScript (ES6+), HTML/HTML5, CSS/CSS3, Bootstrap, Material-UI
- ✓ BACKEND : NoedJS, Expressjs
- ✓ Database : MongoDB,MySQL
- ✓ State Management: Redux, React.js hooks
- ✓ Other Skills: C and C++ Language
- ✓ Version Control: Git, GitHub

RELEVANT PROJECTS

Learning Management System (LMS)

Tech Stack: React.js, Node.js, Express.js, MongoDB, MUI, JavaScript

- Built a full-stack Learning Management System (LMS) with secure JWTbased authentication and role-based access control (RBAC) for Admin, Instructor, and Student roles
- Implemented a user-specific cart system allowing students to add courses.
- Designed an Instructor Dashboard to create, update, and manage courses and learning content
- Enabled instructors to upload videos and organize course sections
- Integrated a quiz system where students can take quizzes after completing video lessons and instantly view results
- Implemented Redux Toolkit for efficient state management and API to manage users, courses, categories, enrollments, and cart functionality
- Applied protected routes, form validation, and error handling to enhance security and usability

Movie Booking System

Tech Stack: HTML, CSS, JavaScript, Bootstrap, JSON Server

- Developed a Movie Booking System with separate Admin and User interfaces.
- Built Admin modules for managing Cinema, Movies, Date & Time, and Seat Settings with full functionality.
- Implemented two flexible ticket booking flows for users:
- Select Movie first → then select Cinema and available seats.
- Select Cinema first → then browse Movies and complete booking.
- Designed a fully responsive and user-friendly UI using HTML, CSS, and Bootstrap.
- Used JSON Server as a mock REST API to store and manage user and booking data.
